PROFESSIONAL SUMMARY

Computer Science student specializing in Artificial Intelligence with experience designing, building, testing, and deploying production software and AI systems. Combines full-stack engineering, LLM pipelines, computer vision, forecasting, recommendation systems, Docker, Linux, CI/CD, and API integration to deliver reliable products that automate workflows and support measurable business outcomes.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL, C/C++, Dart

Frontend: React, Next.js, Angular, React Native, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, Microservices, API Integration

AI & ML: LLMs, OpenAI, Gemini, Phi-2, LangChain, Prompt Engineering, NLP, Computer Vision, YOLOv8, LSTM, XGBoost, ARIMA, Recommendation Systems, Time-Series Forecasting, Feature Engineering, Model Evaluation

Systems & Data: Docker, Linux, Git, CI/CD, MongoDB, PostgreSQL, Firebase

PROFESSIONAL EXPERIENCE

Technical Co-Founder | Enara | Aug 2026 - Present

- Own product direction and roadmap planning, translating business and user needs into technical priorities.
- Lead end-to-end product development, architecture decisions, and delivery across AI and software features.

Full Stack AI Engineer | PreGen | Oct 2025 - Present

- Delivered a production MERN and Python AI platform that reduced manual content creation effort by approximately 70%.
- Designed scalable APIs connecting frontend applications, databases, and AI services for real-time product workflows.
- Integrated LLM pipelines for generation, evaluation, and structured outputs.
- Led architecture, Docker-based Linux deployment, and CI/CD setup to improve portability and release reliability.
- Collaborated across product and engineering needs to convert business requirements into maintainable AI-powered features.

Prompt Engineer - Freelance | Independent | Jul 2024 - Present

- Designed prompt pipelines that improved output accuracy, consistency, and resistance to hallucination.
- Built LLM workflows for financial analysis and structured information extraction.
- Integrated AI workflows into production APIs and evaluated outputs through iterative refinement.

UAT Engineer | Geidea Technologies | Aug 2025 - Nov 2025

- Conducted user acceptance testing for financial and payment platforms in Agile delivery environments.
- Validated requirements against system behavior, identified functional gaps, and tracked defects to resolution.
- Coordinated with engineering and product teams to support release readiness.

Full-Stack MERN Intern | ATOS | Jul 2024 - Oct 2024

- Engineered a document management system using MERN and PERN stacks.
- Developed secure REST APIs and reusable React components.
- Applied clean architecture principles to improve maintainability and scalability.

Microservices Software Developer Intern | Relief and Emergency Foundation | May 2024 - Aug 2024

- Implemented microservices architecture for WordPress and MERN platforms.
- Designed modular Node.js backend services and API communication patterns.

Machine Learning Intern | Code Alpha | Feb 2024 - May 2024

- Developed recommendation systems and stock-forecasting models using Python.
- Performed preprocessing, feature engineering, model training, and evaluation.
- Built LSTM-based time-series models and compared predictive performance.

Web Development Intern | Prodigy InfoTech | Jan 2024 - Feb 2024

- Built responsive landing pages and interactive web applications.
- Developed a JavaScript stopwatch application with precise timing logic.

SELECTED PROJECTS

Vehicle Damage Assessment Platform: Built an end-to-end computer-vision inspection workflow using YOLOv8; trained on 35,670 images and 135,431 labels, achieved 0.706 mAP50, integrated repair-versus-replace pricing logic, and maintained 715 passing tests.

Financial AI Advisor: Developed an LLM workflow for financial analysis and structured information extraction, connecting model outputs to production APIs and business workflows.

Selected Additional Work: HKIApply, Medical Video Classification, Swarm_Negotiation, ThreadCRM, and Foundit.

EDUCATION

Bachelor of Science in Computer Science - Artificial Intelligence

RELEVANT TRAINING

MLOps Specialization - Production ML Systems | Meta Front-End Developer | Microservices with Node.js and React | Hyperparameter Optimization | Reinforcement Learning in Python | Google Project Management | Google UX Design | Business Strategy Specialization | Python for Finance
